Further to your Information request ER64119 please see your questions and our response below.

I am writing to request details of the locations of all areas of land which you have identified as being potentially contaminated land as a result of your responsibilities and activities under Part 2A of the Environmental Protection Act 1990. I understand that I am entitled to request such information under Regulation 5 of the Environmental Information Regulations 2004.

I would like the information to be provided in the format of an electronic map. I suspect that like many public authorities with responsibilities under Part 2A of the EPA you maintain a GIS layer which plots the locations of all potentially contaminated land within your area and a copy of this would be my preference.

Response: The current Contaminated Land Register contains no entries under Part IIA. The Council did identify potentially contaminated land but none of the sites investigated required further investigation, therefore there are no entries on Public Register. There is also no Remediation Notices served.

However, we do have a working GIS layer of the potentially contaminated land which was generated by external consultant. However, the layer does contain very basic information such as unknown filled ground, depot, road haulage, etc. This layer does require further work and amendments.

This concludes your request ER64119.

If you require translation of the information you have been sent please do not hesitate to contact us.

If you are unhappy with the information we have provided in response to your request please write to:

Information Management Team Manager
Royal Borough of Windsor & Maidenhead
Town Hall, St Ives Road
Maidenhead
