Further to your Information request ER64960 please find your questions and our responses below:

1. How many electric car charging points are you responsible for (either directly or through a contractor)?

2. How much have you spent on electric car charging in the past three years? Please give a separate total for each financial year (ending 2011, 2012 and 2013) and include installation, operating, maintenance and any other related costs. Please also include the use of any grants, rather than offset them.

3. How many times has each charging point been used in the past 12 months? Please use April 2012 – March 2013 if possible, otherwise the most recent 12 month period available.

I would like to receive copies of any documents that contain the actual information. Therefore, if it is necessary to redact any information, please remove the relevant portion and disclose the remainder of the document.

Response: We have 3 charging points that are used exclusively by the council’s electric vehicle fleet......not used by the public.

Tinkers Lane....1 Charging point at a cost of £1,088.99 for supply and installation of a non metered charger unit in 2011....no grant funding......Maintenance Nil cost to date

St Ives House...1 Charging point at a cost of £1,272.74 for supply and installation of a metered charger unit in 2011....no grant funding......Maintenance Nil cost to date

York House......1 Charging point original cost was £1,542.62 but as there was supply and installation issues the charger was eventually fitted Free of Charge in 2012.....no grant funding.....Maintenance Nil cost to date.

All 3 charging points are used 365 days a year....Once again these charging points are for council vehicles only.

I have been advised we hold no running cost information as regards the cost of electricity.
