Further to your Information request ER65029 please find your questions and our responses below:

Under the general requirements of the Freedom of Information Act 2000, I would be grateful if you would provide the following information in relation to Drift Road, Maidenhead, and in particular the section between Bird Hills Golf Centre (A330) and Howe Lane.

- Dates of all safety inspections undertaken on the carriageway in the two years preceding the 5th December 2012

**Response**: Please see attached.

- Details of all carriageway defects identified during safety inspections in the two years preceding 5th December 2012

**Response**: Please see attached.

- Details of how carriageway safety inspections are undertaken, including whether walked or driven, the speed of the inspection vehicle and the number of persons in the vehicle.

**Response**: Driven inspections are carried out by two people in a car which is driven within the speed limit of the road in this case vehicle speed would be 20mph to 25mph.

- The intended frequency of carriageway safety inspections.

**Response**: Straight Road is currently inspected every quarter.

- Details of all complaints and/or enquiries relating to the carriageway, received in the two years preceding your incident.

**Response**: Please see attached.

- The hierarchy classification.

**Response**: Straight Road is a classified road the C8706.

- The road/section number.

**Response**: The road section number is C8706/045.1. It has one Unique Street Reference Number (USRN) 44400491.

- The defect intervention criteria adopted in relation to the identification of all categories of carriageway potholes.

**Response**: The level of risk that a defect poses in each situation is different. In order to keep to a minimum the amount of onsite assessment made by the Inspectors we have an existing level of risk assessment
applied by using defined intervention levels which differ depending on the classification of the footway or carriageway concerned. This is because the risk of a road user coming into contact with a defect rises with the rising level of use of the highway in question.

- The time period(s) adopted between identification and repair (temporary and permanent) of all categories of carriageway defects.

Response: Potholes which could constitute a serious hazard to users of the highway to be made safe within 3 hours of being notified, followed by a full repair as part of a works programme with the priority to be determined in relation to the nature of the defect.

- Whether or not the authority has formally adopted all or part of the standards contained within the national code of practice for highways maintenance management.

Response: Approved and adopted policies and procedures in respect to the Council's legal requirements and its service provision are contained within the Council's Highway Maintenance Management Plan (HMMP). This document reflects the guidance laid down in the national Code of Practice ‘Well maintained Highways’ and was adopted by the Council in December 2011.

This concludes your request ER65029.

If you require translation of the information you have been sent please do not hesitate to contact us.

If you are unhappy with the information we have provided in response to your request please write to:

Information Management Team Manager
Royal Borough of Windsor & Maidenhead
