<td>What are the expansion plans for the college? How are the kitchen, library and changing rooms going to be expanded? Wasn’t the £15m construction cost enough to get these in the original scheme?</td>
<td>The expansion works planned for Holyport College will expand some of the ‘core’ facilities used by all pupils, i.e. kitchen and changing rooms. This will increase the physical capacity of the buildings, allowing the school to admit more pupils. The £15m budget for building Holyport College was calculated on the basis of 500 pupils on site. With this expansion there will be up to 548 pupils on site, hence the need for additional buildings. Holyport College has since informed us (16th June 2015) that the library project, which is not in the school’s draft Asset Management Plan, should not have been identified on the legal agreement with the developer and will not be funded using S106 funds from this development. This error appears to be the result of a miscommunication between the school and the borough.</td>
</tr>
<tr>
<td>Why are library extensions, changing rooms and kitchen expansions eligible for S106 funds?</td>
<td>S106 developer contributions for schools must be used to increase the capacity of a school to admit more pupils. This often means new classrooms, but can also mean expansion of core areas, such as halls, toilets, libraries, office space and sports facilities, as these are also placed under strain by higher pupil numbers. Since 2010, S106 monies have been spent on a wide range of projects at schools in the borough, including three kitchen extensions and two changing room extensions. Other projects include new classrooms, extensions to undersized classrooms, library extensions, new or extended sports halls and dining facilities, additional toilets, small group rooms and disabled access improvements.</td>
</tr>
<tr>
<td>Why did Holyport College get £480k?</td>
<td>£480k was sought for Holyport College on the basis of £10k per additional pupil place (48 x £10k = £480k). This is in line with the average of actual cost (£10,628) of providing the buildings for an additional pupil place in RBWM, as reported to the DfE in the 2014 statutory School Capacity Return (SCAP – previously known as the Surplus Places Survey). This figure is not related to the amount of revenue funding a school gets for its day to day running costs. New school places are costly. Excluding land purchase costs, a new 210 place primary school might be expected to cost £3-4m. A 1,500 place secondary school could cost £20-£25m.</td>
